

How to create a Remote Context file of your CodeMeter dongle

If you want to add licenses to your dongle or change existing licenses SevenCs will ask you to send a Remote Context File (RaC).

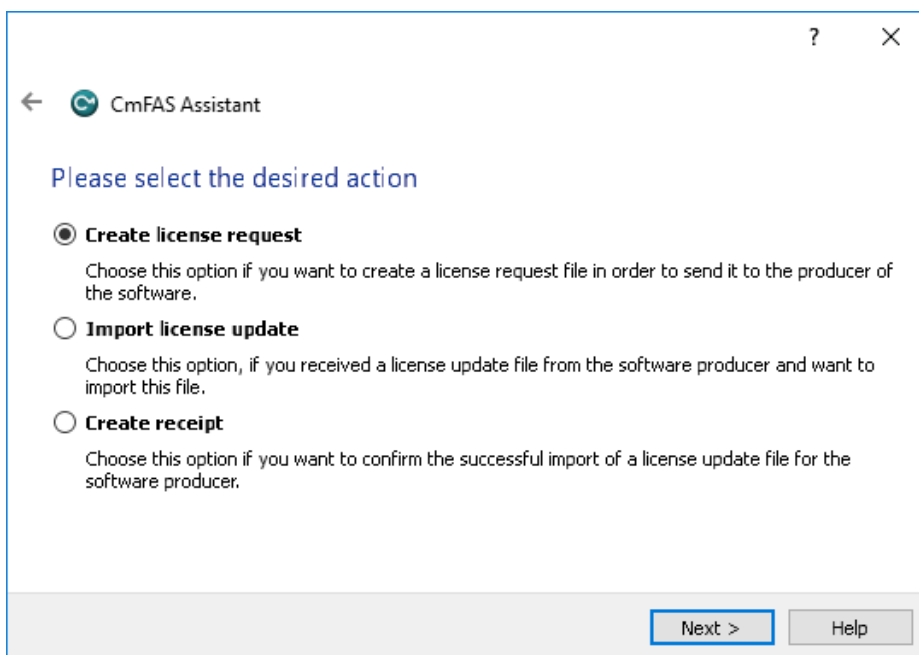

To create this file click in the Control Center on the button License Update:

The CmFAS Assistant will start and guide you through the process:

Select the action “Create license request” and click on Next.

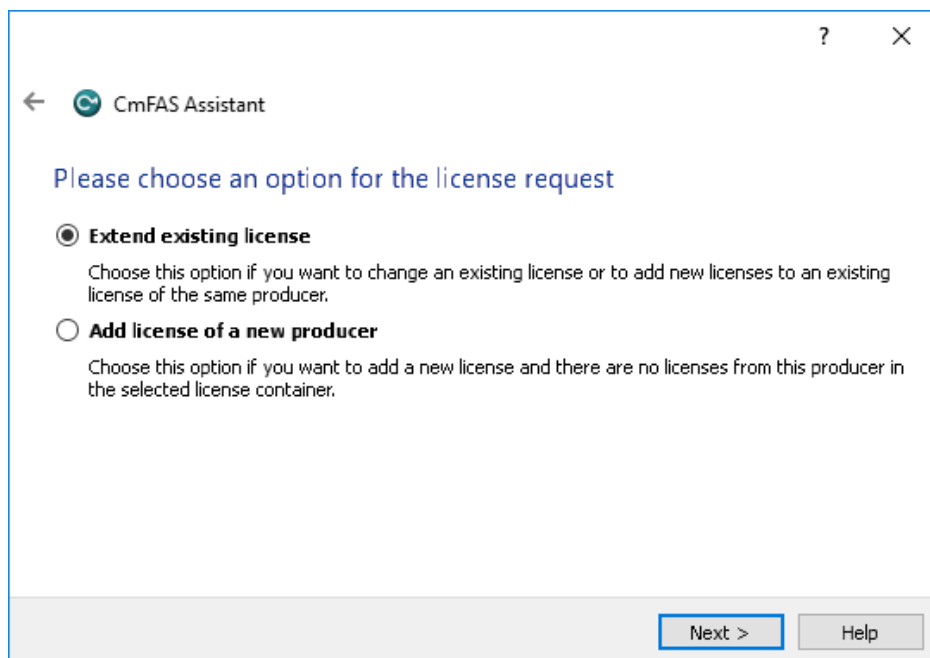

The screenshot shows a dialog box titled "CmFAS Assistant" with a back arrow and a close button. The main heading is "Please select the desired action". There are three radio button options:

- Create license request**
Choose this option if you want to create a license request file in order to send it to the producer of the software.
- Import license update**
Choose this option, if you received a license update file from the software producer and want to import this file.
- Create receipt**
Choose this option if you want to confirm the successful import of a license update file for the software producer.

At the bottom right, there are two buttons: "Next >" and "Help".

Select the option “Extend existing license” and click on Next.

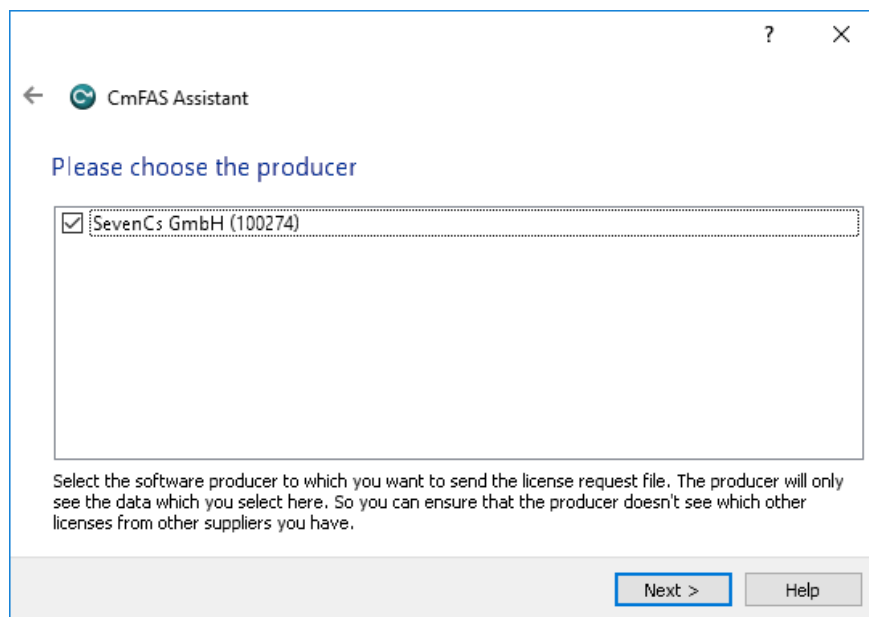

The screenshot shows a dialog box titled "CmFAS Assistant" with a back arrow and a close button. The main heading is "Please choose an option for the license request". There are two radio button options:

- Extend existing license**
Choose this option if you want to change an existing license or to add new licenses to an existing license of the same producer.
- Add license of a new producer**
Choose this option if you want to add a new license and there are no licenses from this producer in the selected license container.

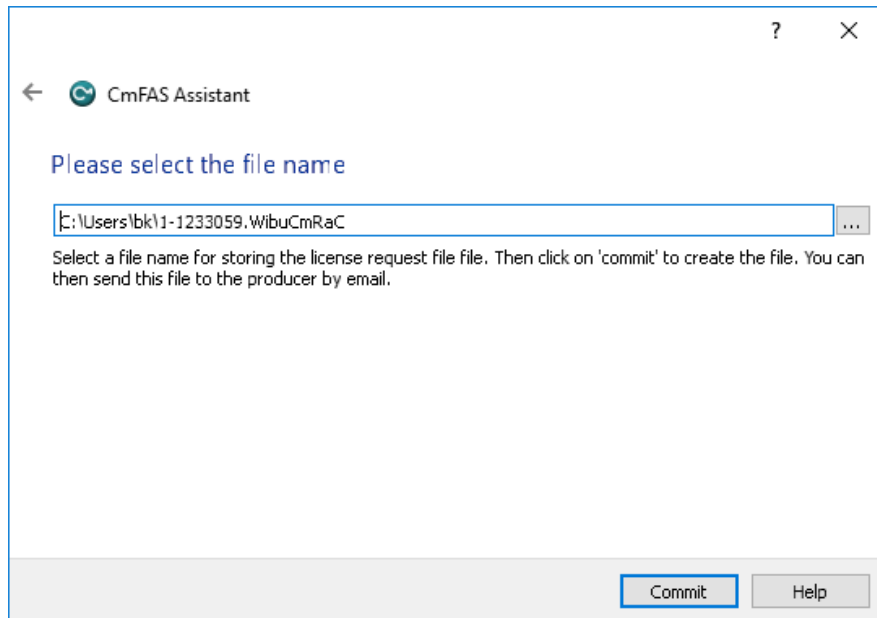

At the bottom right, there are two buttons: "Next >" and "Help".

Select the producer SevenCs GmbH (100274) and click on Next.

The screenshot shows a dialog box titled "CmFAS Assistant" with a back arrow and a help icon. The main heading is "Please choose the producer". Below it is a list box containing one item: "SevenCs GmbH (100274)" with a checked checkbox. Below the list box is a paragraph of text: "Select the software producer to which you want to send the license request file. The producer will only see the data which you select here. So you can ensure that the producer doesn't see which other licenses from other suppliers you have." At the bottom right, there are two buttons: "Next >" and "Help".

Select a filename and a folder and click on Next.

The screenshot shows a dialog box titled "CmFAS Assistant" with a back arrow and a help icon. The main heading is "Please select the file name". Below it is a text input field containing the path "C:\Users\lwk1-1233059.WibuCmRaC" and a browse button "...". Below the input field is a paragraph of text: "Select a file name for storing the license request file file. Then click on 'commit' to create the file. You can then send this file to the producer by email." At the bottom right, there are two buttons: "Commit" and "Help".

Finally the CmFAS Assistant shows you a message that the license request is created successfully.

Send this file to SevenCs (e-mail to support@sevencs.com).
